

LMOL Report for 2018-06-17 – 06-19

Contact: G. Gronoff

LMOL Team: W. Carrion, T. Berkoff, J. Sparrow, G. Gronoff

Operator for the day: W. Carrion (17-18 morning), G. Gronoff (18 morning- 19)

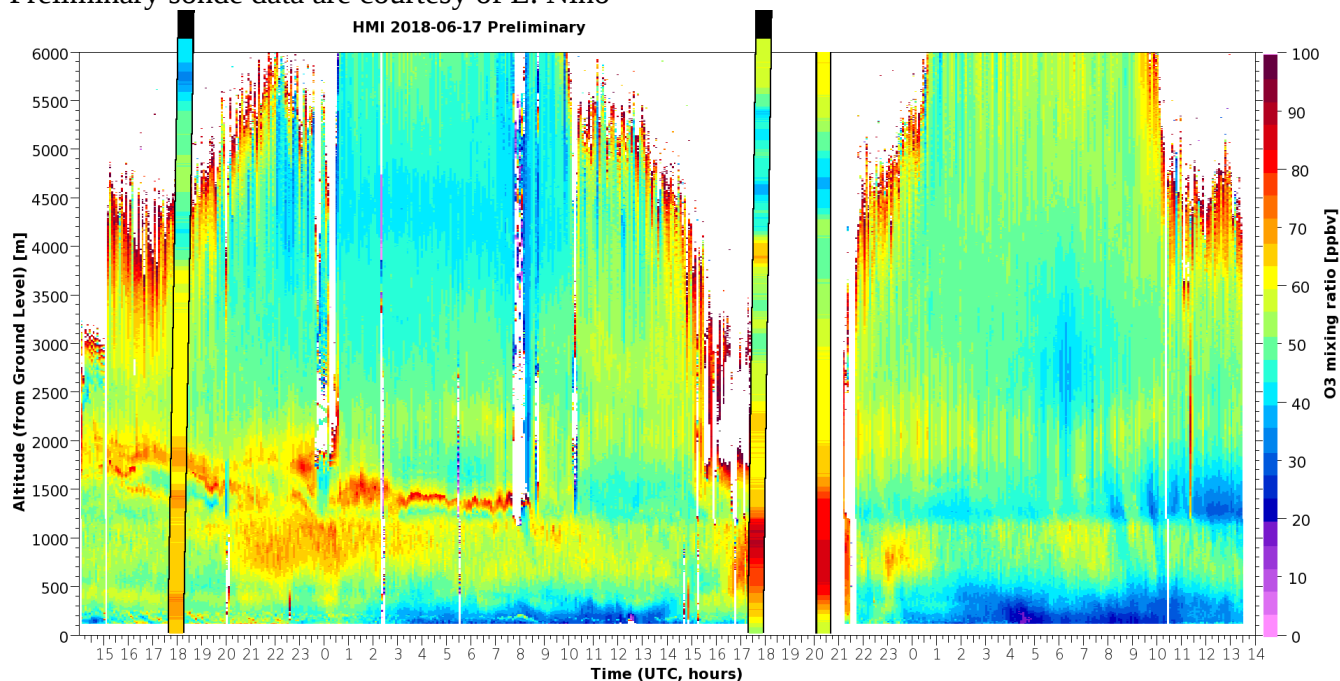

PLEASE NOTE:

This data is preliminary and should not be used for official business.

LMOL / Lidar 2018-06-17 to 2018-06-19

The Lidar performed nominally for the whole duration except for a power outage hiatus on the 18th at 14h LT-17hLT.

Preliminary sonde data are courtesy of L. Niño

LMOL / Weather Station and Ground O3

The new POM did perform nominally for an hour when a filter was removed (probably blocking too much air intake). The POM did not perform nominally after the power outage.

The Weather station performed nominally until the power outage, and was restarted shortly after the power went back.
